REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable because the prior art fails to show a method of inflation comprising filtering combustion products and then humidifying the filtered products without further filtering. DE 19612581 fails to show a final filtering step before exit of the inflator. Lohr (US 3,711,115) shows a gas generator which includes a humidifying phase, however Lohr fails to show any filtering of the gas. Kirchoff et al. teaches gas generator with multiple filters, however the gas is filtered before and after pH treatment. It would not have been obvious to one of ordinary skill in the art to modify Lohr to include a filter before the humidifying without using any further filtration. Additionally, it does not appear that it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Lohr to include a filter due to the unusual configuration of the central conduit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
